This young lady had to be carried to the meeting by her parents.
2 years ago the doctors discovered that 2 vertebrae disappeared from her spine. This unknown disease made her bedridden.
When she tried to sit up, she cried from terrible pain.

When we came to talk to her, she told us about the interesting dream she saw the previous night:

“I saw a great field and a lot of people.
I saw a yurt where the Word of God is preached.
I ran in this field and rejoiced
in God’s presence.”

One of the evenings during the music program we noticed that she sat up. It is hard to imagine what pain she could have experienced in order to make this step of faith. We came to her and asked if it hurts badly. She smiled and answered that there was no pain at all.

A Miracle for the first time in
a very long time...
the next day she walked into
the tent with the help of her
family. She was able to stand
and make steps putting her
weight on her feet.
She did not feel any pain in
her spine!
